

# What is Microtransit?

Microtransit is a convenient, on-demand transit option that uses smaller vehicles to provide service within designated zones.

Microtransit is a key initiative outlined in the *Envision My Ride: Bus Priority Study*, adopted by the Metropolitan Transit Commission (MTC) in May 2022. It is part of the larger goal to build a more reliable, connected and accessible bus network for the greater Charlotte area.

## WHAT WOULD IT MEAN FOR ME?

You may experience convenient, on-demand service from your neighborhood to major destinations, like existing transit routes, **mobility hubs** or even on-demand service that takes you directly to your destination.

**Mobility hubs** are enhanced transit stops that improve connections between bus and other modes of travel, like rail, bike or microtransit.

## WE APPRECIATE YOUR FEEDBACK!
